

Seminar on

"Shell Structures Design and Construction practice in Ethiopia"

Eng. Derje Seyoum, a senior practicing engineer having a rich experience in shell structures design, will share us the basic theoretical and practical experience as a spring board for further insight for practice academic and research practices.

The academic discourse will have the following contents:

- ♣ Practice and design in shell structures
- ♣ A design and construction aspect of recently completed shell structures- a case study with elaboration
- ♣ Upcoming project and designers of shell structures in the construction industry
- ♣ Two-way discussion about any perspectives related to shell structures.

Speaker: Dereje Seyuem(Senior Practicing Engineer)

Wednesday : 3:00-6:00 Local Time

Venue: Conference room
